

MECHANICAL ENGINEER (AUTOMOTIVE)

As a junior professional, you will be involved with projects of development of electrical distribution systems in a global automotive TIER-1 leader in **Gipuzkoa**. Systems mainly in plastic parts material + CAD definition of the project. You will play a role as a CAD engineer: 3D and drawings. Working following instructions of a product leader.

WE HAVE

An unparalleled **Employeneurship** Model.

The term Employeneurship might sound unfamiliar. It's because we invented it. Not just as a word but as a way of working, a paradigm even. Basically Employeneurship is about thinking and acting like an entrepreneur, with the security of employment. But more than anything, it is a guarantee for continuous development and the opportunity to really be responsible for the direction of your career, with :

- Permanent employment contract
- Individual profit sharing at project level
- One-on-One Dedicated Coaching
- Neuronal Expertise Cell Structure
- Entrepreneurial Lab.

YOU HAVE

- Degree in Engineering (mechanical, automotive or similar)
- Strong skills in: **CATIA, AUTOCAD**, 2D & 3D drawing tools.
- Following automotive OEM's specs, automotive parts definition.
- Ability to manage the CAD definition project with a customer (customer, internal customer and high level suppliers) oriented attitude.
- Global and multicultural customers and suppliers. So, an independent level of English language knowledge is necessary.

TMC

We are an international high-tech company, comprised of Employeneurs with more than 30 nationalities who provide services to customers all over the world. We excel in research, development and engineering.

With offices in the Netherlands, Belgium, France, Spain and Italy we are every inch a pan-European organization. But our reach and outlook is even bigger than that, as our projects and customers are anywhere. From Madagascar mining sites to Chinese high tech manufacturers; our Employeneurs feel right at home.
